{ brand_guidelines } v1.0 · 2026

How Retani looks, everywhere.

One wordmark, one dot, three colours, two typefaces. These rules keep the brand consistent across the website, mobile, print, email and the app icon.

Logo

wordmark

Set in Geist Semibold, all lowercase, tracked −5%. Lowercase keeps it approachable and technical, like a filename.

monogram

"r." is used where the full wordmark won't fit: app icon, favicon, social avatars.

the dot

The lime full stop is the brand's signature. It means "done, shipped". It is the only colour in the logo and never moves.

primary · ink on paper

reversed · paper on ink

on lime · dot turns ink

one colour · fax, stamps, engraving

clear space

Keep a margin of x on every side, where x is the height of the letter "r". Nothing enters this area.

minimum size

retani.

80px / 20mm wide

monogram 16px / 5mm

Below these sizes the dot disappears. Switch to the monogram instead of shrinking the wordmark.

proportion

Lime is an accent, not a fill. Use it for the dot, one highlight per view, and the occasional comparison card. Never set body text in lime on paper; it fails contrast.
